Executive Summary – fnp Sales Analysis

Key Performance Indicators

- **Total Orders: 1,000**
- **Total Revenue: ₹35,20,984**
- **Average Customer Spending: ₹3,520.98 per order**
- **Order-to-Delivery Time: 5.53 days**

These figures indicate strong sales volume with healthy per-order spending, though delivery timelines may warrant optimization.

Revenue Insights

- **By Occasion:**
  - **Highest revenue spikes around Valentine's Day and Raksha Bandhan, showing strong seasonal demand.**
  - **Anniversary and Birthday occasions also contribute significantly, suggesting consistent year-round sales drivers.**
- **By Category:**
  - **Cakes dominate revenue, followed by Plants and Sweets, highlighting product categories that should be prioritized for marketing and inventory.**
  - **Niche categories like Mugs and Soft Toys generate comparatively lower revenue, suggesting potential for bundling or repositioning.**
- **By Month:**
  - **Revenue peaks in February (Valentine's Day) and August (Raksha Bandhan), confirming seasonal dependency.**
  - **Off-season months show moderate performance, indicating opportunities for promotional campaigns to smooth demand.**
- **By Hour (Order Time):**
  - **Orders cluster around afternoon and evening hours, suggesting customer engagement is highest later in the day.**
  - **This insight can guide digital ad placements and delivery scheduling.**

Top Products

- **Deserunt Box and Dolores Gift lead product-level revenue, each exceeding ₹1,00,000.**
- **The top 5 products collectively account for a significant share of total revenue, underscoring the importance of maintaining availability and premium positioning.**

Geographic Performance

- **Top Cities by Orders:**
    - **Bhatpara, Bhavnagar, and Bilaspur are the strongest contributors, each with ~30–35 orders.**
    - **Smaller cities like Imphal and Kalyani show emerging demand, suggesting potential for targeted regional expansion.**

Strategic Takeaways

1. **Seasonality Drives Sales: Valentine's Day and Raksha Bandhan are critical revenue peaks. Marketing and inventory planning should intensify ahead of these occasions.**
2. **Category Focus: Cakes, Plants, and Sweets are the backbone of revenue. Invest in product innovation and upselling in these categories.**
3. **Delivery Optimization: With an average delivery time of 5.53 days, improving logistics could enhance customer satisfaction and repeat purchases.**
4. **Regional Growth: Strong performance in tier-2 cities highlights untapped potential. Regional campaigns could accelerate growth.**
5. **Customer Engagement Timing: Afternoon/evening order peaks suggest optimal windows for promotions and customer outreach.**
6. **Correlation between order Quantity and Delivery time is neutral. there is no effect of one on another.**

This summary positions the dashboard as a decision-support tool: it highlights where sales are strongest, where operational improvements are needed, and where growth opportunities lie.
